PROFILE

Hello viewer, I am currently pursuing my B.Tech from GGSIPU-EDC (USAR) in the Automation and Robotics branch. I have been in the field of Web Development since last 6 months. I am currently working on only front-end development and aiming to become a full stack web developer. This is my resume, which showcases my projects and my qualifications. I only have experience of working with college clubs as of now and looking forward to many new and skillful opportunities in up coming future.

WORK EXPERIENCE

Front-end web developer

Software Development Club (SDC) USAR   **2024 - Present**

- Serving as a front-end web developer, responsible for developing web pages interfaces.
- Also responsible for coordinating events/ seminars/ workshops etc. organised by the club.

Front-end web developer

Perceptions USAR (Publication Club)   **2023 - Present**

- Serving as a front-end web developer, responsible for developing web pages interfaces.
- Also responsible for coordinating events/ seminars/ workshops etc. organised by the club.

PROJECTS

Perceptions Main website

College publication website, created by me and my team. This is another webpage created using just HTML and CSS and just a tinch of JS. I offers valueable info. about the events and other activities taking place in our college.

Clones using html and css

These clones are developed using only html and css. Most of these are unresponsive.

- Github landing page
- Netflix landing page
- Google Meet landing page
- Swiggy landing page
- Playstation website landing page
